

Venue: NWCR,  
200 London Rd.,  
Liverpool, L3 9TA.

**Date: Friday 31<sup>st</sup>  
March 2017**

# Genomics and Oncology Study Day

NWC Genomics Healthcare Alliance Education Group & NWC  
Oncology Education Group

---

*“Cancer teams need  
to realise the power  
genomics and  
personalised  
medicine will bring  
to their clinics”*

*Professor Sir Munir  
Pirmohamed*

---

## Who should attend:

This event is aimed at all members of the Cancer Multi-disciplinary teams, including cancer surgeons, physicians, nurses and laboratory staff.

## Aims:

- to provide an update on potential transformation of cancer services as genomics and personalised medicine become embedded into mainstream healthcare.
- to summarise cutting edge developments in cancer medicine therapeutics linked to genomics

## Outcomes:

Following the workshop, cancer clinicians will have a greater understanding of:

- cancer genomics and the role of the MDT.
- which patients need genetic testing along their cancer journey
- how to organise genetic testing for your patient.
- a greater understanding of emerging new therapies for their cancer

Prices: **£80.00** per  
delegate or  
**£40.00** for LHP  
Staff.

**Fully funded  
places** are  
available for  
Nurses, full details  
on application.

**Book online at <https://sales.webticketmanager.com//default.aspx?companyid=1091&eventid=13053>
