

# Master's in Genomic Medicine: PGdip, Master's application

Process for genomic medicine Master's students who have been awarded a PGcert and wish to apply for a PGdip; or have been awarded a PGdip and wish to apply for a full Master's degree.

The below information will be obtained using the HEE GEP application form.  
Your chosen university will start this process.

Applicant applies to their chosen university to undertake additional modules to achieve either a PGdip or Master's degree.

University notifies Health Education England's Genomics Education Programme (HEE GEP) using the application form, to include:

- applicant's name;
- contact details; and
- a statement confirming the individual's capability and previous modules completed.

HEE GEP will contact the applicant to obtain their job title, organisation and line manager details.

A 500-word statement will also be required from the applicant, to include:

- evidence that the individual has tried to obtain funding elsewhere;
- information about how they are actively involved in the GLH/GMSA structure or GMS; and
- how they plan to utilise the qualification following award.

HEE GEP contacts the applicant's line manager for the supporting statement, which must include:

- evidence that the qualification aligns to local/regional workforce plans; and
- information about how the knowledge gained will be utilised locally/regionally/nationally.

Supporting statement received back by the date specified. The panel will meet to review applications on 23rd June 2020, 8th September 2020 and 23rd March 2021.

HEE GEP decision communicated to the applicant, their line manager and the university.
